PlayPix

OFFICIAL BRAND BOOK & VISUAL IDENTITY SYSTEM

The definitive single source of truth for desktop UI, marketing campaigns, website architecture, and motion graphics.

PRODUCT CATEGORY	DOCUMENT VERSION	TARGET PLATFORM	AUTHOR & STEWARD
Windows Desktop Audio Player	v1.2.0 (Official)	Windows 10 / 11 (Desktop)	PlayPix Design Systems

EXECUTIVE OVERVIEW

Table of Contents & Brand Map

A structured overview of the six core phases that define the PlayPix visual and product ecosystem.

CHAPTER 1 • PROJECT FOUNDATION & REALITY AUDIT
Core problem, product scope, local-first philosophy, verified vs. planned features. **PAGE 03**

CHAPTER 2 • BRAND IDENTITY & MESSAGING SYSTEM
Brand purpose, vision, mission, user personas, brand story, tagline, tone of voice matrix. **PAGE 04**

CHAPTER 3 • VISUAL IDENTITY & UI SYSTEM
Logo symbol geometry, clear space, core colors, typography, UI component showcase. **PAGE 08**

CHAPTER 4 • MOTION DESIGN BRAND GUIDELINES
Motion personality, timing & easing physics, logo reveal storyboard, product film blueprint. **PAGE 23**

CHAPTER 5 • WEBSITE & MARKETING ART DIRECTION
Official website architecture, hero section narrative, promotional visual standards. **PAGE 26**

CHAPTER 6 • DESIGN TOKENS & PRODUCTION ASSETS
Full CSS tokens table, creative checklists, master AI creative direction prompt. **PAGE 28**

GUIDING PRINCIPLE

Preserving Product Authenticity Across All Creative Media

PlayPix is an actual desktop application with a verified codebase and distinct visual identity. This Brand Book serves to scale PlayPix across marketing, web, and video without drifting into fantasy features or generic tech tropes. Every rule herein is derived directly from the application's real engineering and aesthetic foundations.

PHASE 1 &BULL; AUDIT & FOUNDATION

What PlayPix Is & The Problem It Solves

An honest, verified assessment of the software's purpose, category, and real-world technical boundaries.

The Problem: Streaming Fatigue & Audio Clutter

Modern streaming services have turned music listening into an algorithmic transaction filled with telemetry, subscription paywalls, intrusive social feeds, and compressed audio streams. Users who own high-resolution lossless music collections (FLAC, MP3, WAV, M4A) have been neglected, forced to choose between outdated players from 2005 or bloated electron web-wrappers.

The Solution: Desktop-First Local Audio Sanctuary

PlayPix is a modern, high-performance Windows music player engineered specifically for local audio. It treats the user's music archive with visual reverence: extracting rich palettes from album art, rendering real-time audio visualizers, and providing an elegant floating glass dock-all while operating 100% offline with zero surveillance.

FEATURE / SUBSYSTEM	VERIFIED STATUS	TECHNICAL IMPLEMENTATION & EVIDENCE
Local Library Scanner & Watcher	VERIFIED IMPLEMENTED	Multi-thread worker parsing ID3 tags, recursive directory scanning, duplicate detection.
SQLite Embedded Database	VERIFIED IMPLEMENTED	WAL journaling, fast indexing across songs, albums, artists, folders, history.
Floating Glass Dock & Navigation	VERIFIED IMPLEMENTED	Custom capsule dock with backdrop-blur-xl floating cleanly above the music bar.
Audio Visualizer (Circular Mode)	VERIFIED IMPLEMENTED	HTML5 AudioContext analyser canvas radiating around centered album cover.
Dynamic Album Art Theme	VERIFIED IMPLEMENTED	node-vibrant / custom palette extraction deriving ambient gradients from album art.
Windows Mini Player	VERIFIED IMPLEMENTED	Frameless 270x270 BrowserWindow with always-on-top toggle and rounded glass card.
Cloud Sync & Mandatory Accounts	EXCLUDED BY DESIGN	PlayPix is strictly local-first and private. No cloud syncing or online accounts exist.

PHASE 2 &BULL; STRATEGY & POSITIONING

Brand Strategy, Purpose & Market Matrix

Defining the core pillars and competitive positioning that separate PlayPix from traditional and streaming players.

Brand Purpose

To restore pride, intimacy, and aesthetic joy to owning music on the desktop, creating a distraction-free audio sanctuary.

Brand Vision

To become the gold standard desktop media player for Windows-where audiophile performance meets modern UI artistry.

PLAYER	AUDIO SOURCE	UI DESIGN QUALITY	PRIVACY & LOCAL AUTONOMY	PLAYPIX DIFFERENTIATOR
PlayPix	Local Files (Lossless/MP3)	Modern Glassmorphic (10/10)	100% Private, On-Device	Dynamic art palettes, floating dock, visualizer
Windows Media Player	Local Files	Basic Windows 11 Fluent (5/10)	Local, some telemetry	Lacks visualizer richness, rigid layouts
foobar2000 / AIMP	Local Files	Dated Win32 UI (3/10)	100% Private	Complex scripting required for basic modern UI
Spotify / Apple Music	Cloud Streaming	Corporate Commercial (7/10)	Extensive telemetry & ads	Loss of ownership, subscription dependency

UNIQUE SELLING PROPOSITION (USP)

The Aesthetic Audiophile Player for Windows

PlayPix combines the instantaneous speed and local ownership of foobar2000 with the visual sophistication of high-end design tools. It is an offline desktop instrument designed for music lovers who care about album artwork, typography, and acoustic presence.

PHASE 2 &BULL; AUDIENCE & PERSONAS

Brand Personality & Core User Profiles

Who PlayPix is built for and the emotional resonance it creates across distinct listener archetypes.

1. The Lossless Purist (Julian, 29)

Role: Software Engineer & Audiophile
Habit: Maintains a 400GB FLAC/ALAC library on local SSD.
Pain Point: Hates cloud streaming compression and dated player interfaces.
PlayPix Value: Zero metadata lag, bit-perfect playback, beautiful album grids.

2. The Focused Creator (Maya, 24)

Role: Motion Designer & Video Editor
Habit: Listens to synthwave and instrumental ambient during long edit sessions.
Pain Point: Overwhelmed by streaming ads, recommendations, and window clutter.
PlayPix Value: Compact pinned Mini Player, distraction-free offline sanctuary.

3. The Aesthetic Curator (David, 21)

Role: Architecture Student & Vinyl/Digital Collector
Habit: Curates custom playlists by vibe, artwork color, and era.
Pain Point: Streaming apps enforce rigid algorithmic playlists with tiny covers.
PlayPix Value: 4-cover collage playlists, dynamic album art glow, full-screen Now Playing stage.

EMOTIONAL EXPERIENCE TARGET

Calm, Focused, Tactile, and Acoustically Immersive

Interacting with PlayPix should evoke the tactile pleasure of opening a vinyl gatefold jacket or adjusting the dials on a premium hi-fi amplifier. It is responsive, elegant, and peaceful.

PHASE 2 &BULL; STORY & MESSAGING

Brand Story, Taglines & Messaging Hierarchy

The voice, vocabulary, and narrative framework used to communicate PlayPix across all marketing channels.

The PlayPix Brand Story

Music was never meant to be rented. For decades, music lovers collected physical records, marveling at the artwork, cherishing the sleeve notes, and building personal sanctuaries of sound. When audio shifted to the cloud, we gained convenience but lost the connection-swapping ownership for endless subscription fees and algorithmic noise.

PlayPix was born to bring that reverence back to the modern desktop. Engineered from the ground up for Windows, PlayPix honors your personal music library. It wraps your lossless tracks in deep obsidian glass, breathes life into your album artwork with radiant dynamic themes, and keeps your listening habits 100% private. Your music. Your sanctuary. Your PlayPix.

Official Brand Tagline

"Music makes everything better."

Role: Core emotional anchor shown prominently on the Home dashboard hero banner and brand end cards.

Proposed Marketing Taglines

- Desktop audio, elevated. (Product-first tagline)
- Your music. Your sanctuary. (Privacy & ownership focus)
- Reclaim your sound. (Campaign launch slogan)
- Hear your archive in a new light. (Visualizer & artwork focus)

PHASE 2 &BULL; TONE OF VOICE

Tone of Voice & Copywriting Standards

Guidelines for crafting clear, product-focused, and non-generic marketing communication.

1. Architectural & Refined

We speak with the precision of high-end industrial design. We value clean structure, subtle detail, and understated confidence over breathless hyperbole.

2. Respectful of Music

We treat music as an art form, not 'content' or 'streams'. We honor album art, song metadata, and the listener's dedication to their archive.

CONTEXT	DO (PLAYPIX VOICE)	DON'T (AVOID)
Product Pitch	"A modern desktop music player engineered for local lossless sound and visual elegance."	"The revolutionary AI-powered music app that will blow your mind with infinite possibilities!"
Feature Highlight	"Dynamic album art extraction brings the colors of every record to your desktop ambiance."	"Insane next-gen lighting algorithms designed to revolutionize your screen experience."
Privacy & Offline	"100% on-device. No cloud accounts, no subscription paywalls, zero listening telemetry."	"We promise we won't steal your data like the bad big tech companies."
Performance	"Instant SQLite library querying across 50,000+ tracks with zero UI latency."	"Blazingly hyper-fast beyond the speed of light."

PHASE 3 &BULL; LOGO SYSTEM

Logo Geometry, Symbolism & Wordmark

The mathematical construction and symbolic anatomy of the official PlayPix emblem.

The PlayPix Emblem Anatomy

The PlayPix brand mark is a 3D isometric ribbon fusion of two foundational symbols: the letter 'P' and the universal Play triangle.

- Origami Prism Ribbon: A continuous dimensional ribbon wrapped into the letter 'P', symbolizing continuous audio flow.
- Inner Play Triangle: Embedded naturally in the negative space of the bowl, signifying playback and acoustic energy.
- Electric Cobalt Gradient: Shifting from deep royal blue (#1d4ed8) to electric cyan (#60a5fa), radiating an internal glow.
- Soft Rounded Bevels: Harmonizing with Windows 11 rounded geometry and PlayPix's glass cards.

Official PlayPix Glowing Emblem (1024x1024 Master Vector Asset)

WORDMARK TYPOGRAPHY

Clean Modernist Wordmark Lockup

The wordmark is set in Segoe UI Bold with custom optical tracking (+20em). In horizontal lockups, the height of the wordmark matches exactly 45% of the emblem's bounding box height, with a separation gap equal to 0.75X of the emblem width.

PHASE 3 &BULL; LOGO SPECIFICATIONS

Clear Space, Minimum Sizing & Scaling Constraints

Rules ensuring optical integrity and legibility across high-DPI desktop screens and digital collateral.

The 1.5X Clear Space Formula

To ensure optical prominence, the PlayPix emblem must always be surrounded by an exclusion zone free of typography, icons, or borders.

- Clear Space Unit (X): Defined as 25% of the emblem's outer diameter.
- Minimum Clearance: Maintain at least 1.5X spacing on all four sides.
- Titlebar Safe Area: Inside the Windows titlebar, maintain a minimum of 16px padding from the window edge.

Minimum Display Sizes

- App Icon (Windows Desktop / Taskbar): Minimum 48 x 48 px. Render with full outer glow.
- In-App UI Titlebar: Minimum 24 x 24 px. Use simplified inner play triangle.
- Favicon / Browser Tab: Minimum 16 x 16 px. Remove outer glow for crisp pixel alignment.
- Print Collateral: Minimum 15 mm (0.6 in) diameter.

HIGH-DPI DESKTOP SCALING RULES

Fractional Windows Display Scaling (125%, 150%, 200%)

The PlayPix icon is compiled as a multi-resolution `.ico` containing 16, 24, 32, 48, 64, 128, 256, and 512px bitmaps. In web and marketing graphics, always render from the master SVG or 1024px PNG source to prevent resampling blur.

PHASE 3 &BULL; LOGO COMPLIANCE

Approved Colorways & Misuse Restrictions

Enforcing strict brand consistency across light, dark, and monochrome environments.

Approved Logo Colorways

1. Signature Glow (Default): Dimensional gradient with cyan outer aura on obsidian (#080c18).
2. Flat Solid Cobalt: #2563eb for single-color print, merchandise, or technical documentation.
3. Monochrome White: 100% white (#ffffff) for dark backgrounds where color is restricted.
4. Monochrome Dark: #0f172a for light document invoices or pure black-and-white print.

Strict Logo Restrictions (Never Do)

- DO NOT stretch, condense, or alter the 1:1 aspect ratio.
- DO NOT add unauthorized drop shadows, bevels, or harsh outlines.
- DO NOT change the cobalt gradient to arbitrary colors (red, green, orange).
- DO NOT separate the inner play triangle from the outer ribbon.
- DO NOT place the glowing logo on busy photo backgrounds without a dark scrim.

BACKGROUND CONTRAST GUARANTEE

Minimum 4.5:1 Luminance Ratio

When placing the PlayPix logo over album artwork or marketing illustrations, always apply an underlying 60% obsidian scrim or place it inside a frosted glass pill container to ensure pristine visual pop.

PHASE 3 &BULL; COLOR SYSTEM

Core Palette: Deep Obsidian & Signature Cobalt

The official primary, secondary, surface, and text color tokens extracted directly from application code.

Space Obsidian
#080c18
Base Canvas BG

Surface Slate
#0f172a
Cards & Sidebar

Elevated Slate
#1e293b
Active Cards & Borders

Deep Cobalt
#2563eb
Primary Brand / Buttons

Electric Blue
#3b82f6
Accent & Indicators

Sky Cyan
#60a5fa
Highlights & Badges

Pure White
#f8fafc
Primary Typography

Muted Slate
#94a3b8
Secondary Typography

Subtle Gray
#64748b
Dividers & Metadata

Cobalt Glow
#3b82f640
Radial Ambient Lights

COLOR SYSTEM ARCHITECTURE

The 60-30-10 Composition Formula

In all PlayPix interfaces and marketing assets, adhere to the 60-30-10 rule: 60% Deep Obsidian (#080c18) for negative space and calm, 30% Surface Slate (#0f172a / #1e293b) for UI structure, and 10% Signature Cobalt & Cyan (#2563eb / #60a5fa) for focal points and active states.

PHASE 3 &BULL; LIGHT MODE & GLASS

Frosted Pearl Light Theme & Glassmorphism Tokens

Engineering high-contrast daytime usability and premium translucent glass layers.

Frosted Pearl Light Theme System

PlayPix features a dedicated Light Theme designed for daytime listening and bright work environments.

- Base Canvas: Frosted Pearl #f8fafc (soft off-white to eliminate glare).
- Surface Cards: Pure White #ffffff with 1px border #e2e8f0.
- Primary Text: Ink Obsidian #0f172a (14:1 contrast ratio).
- Accent Button: Deep Cobalt #2563eb with crisp white icons.

Glassmorphism Token Standards

Translucency is used purposefully for elevated floating components, never for background clutter.

- Floating Dock Surface: rgba(8, 12, 24, 0.72) with backdrop-filter: blur(20px).
- 1px Glass Border: rgba(255, 255, 255, 0.10) top-lit edge reflection.
- Floating Elevation Shadow: 0 20px 40px rgba(0, 0, 0, 0.45).
- Cobalt Aura: Subtle 0 0 30px rgba(37, 99, 235, 0.18) behind floating capsules.

ACCESSIBILITY & READABILITY STANDARD

WCAG AAA Compliance for Text Over Glass

Glass surfaces in PlayPix must always maintain an opacity of at least 72% over moving content. Pure white text (#f8fafc) on dark glass delivers a contrast ratio exceeding 9:1, far surpassing WCAG AA requirements.

PHASE 3 &BULL; DYNAMIC COLOR ENGINE

Dynamic Album Art Palette Extraction

How PlayPix derives real-time ambient color themes from music artwork without breaking UI readability.

Algorithmic Extraction Workflow

When a track begins playing, the main process decodes its cover art and extracts a 6-color palette token structure:

- primary: Dominant saturated hue used for visualizer rays and active scrub bar.
- secondary: Supporting harmonic hue used for secondary gradients.
- accent: High-vibrancy accent applied to heart toggle and glowing indicators.
- glow: 35% opacity alpha tone generating radial atmospheric backlights.
- bgDark / bgLight: Deep tinted dark/light canvas backgrounds for Now Playing.

Contrast Preservation Safeguards

Dynamic color extraction can easily ruin legibility if left unconstrained. PlayPix enforces strict safeguards:

1. Fixed Button Glyphs: Play/pause and transport icons always remain high-contrast white.
2. Desaturation Clamping: Extracted backgrounds are clamped to a maximum 35% saturation.
3. Fallback Hash: If a track lacks artwork, a deterministic palette is generated from the song title string.

VERIFIED CODE IMPLEMENTATION

CSS Custom Properties Injection (NowPlaying.tsx)

Tokens are dynamically bound to the Now Playing root: --np-primary, --np-secondary, --np-accent, --np-glow, and --np-bg. This enables silky 400ms CSS color transitions when skipping tracks.

PHASE 3 &BULL; TYPOGRAPHY

Type Hierarchy & Font System

Native Windows typographic harmony powered by Segoe UI with deliberate optical scaling.

Primary Typeface: Segoe UI Family

PlayPix uses Windows' signature font, Segoe UI (and Segoe UI Variable on Windows 11). This ensures instant zero-latency rendering, sub-pixel ClearType sharpness, and seamless visual harmony with the Windows desktop shell.

- Segoe UI Bold (700): Titles, section headers, active tab indicators, and branding.
- Segoe UI Semi-Bold (600): Song titles, button labels, and playlist headers.
- Segoe UI Regular (400): Artist names, album titles, durations, body paragraphs.
- Segoe UI Italic: Metadata secondary callouts and empty-state hints.

ROLE	FONT WEIGHT	SIZE / LEADING	TRACKING	EXAMPLE USE
Display 1	Bold (700)	44 pt / 50 pt	-0.5 px	Hero banner "Music makes everything better"
Headline 1	Bold (700)	28 pt / 34 pt	-0.2 px	Now Playing song title, Section headers
Headline 2	Semi-Bold (600)	18 pt / 22 pt	0.0 px	Album cards, Playlist title, Modal headers
Body Regular	Regular (400)	14 pt / 20 pt	0.0 px	Song row title, Settings descriptions
Caption / Meta	Regular (400)	11 pt / 15 pt	+0.2 px	Artist subtext, Track durations, Bitrate tags
Badge / Tag	Bold (700)	9.5 pt / 12 pt	+1.0 px	UPPERCASE category pills, Audio format tags

PHASE 3 &BULL; GRAPHIC LANGUAGE

Design Language, Corner Radii & Geometry

The geometric constants, border treatments, and elevation rules that unify PlayPix.

Corner Radius Scale

• 24px (Pill / Capsule): Floating navigation dock, search inputs, modal action buttons.
• 16px (Large Container): Hero banners, Mini Player window, Now Playing stage.
• 12px (Standard Card): Album cards, playlist cards, stats panels.
• 8px (Small Card): Song rows on hover, dropdown menus, context menus.
• 9999px (Full Circle): Artwork in Now Playing, artist avatars, play buttons.

Border & Surface Physics

• 1px Hairline Borders: All cards use 1px stroke rgba(255,255,255,0.08) to catch light.
• Layered Elevation: Floating elements feature dual-layer drop shadows (ambient + direct).
• Restrained Glow: Glowing effects are strictly confined to active cobalt indicators and art extraction.
• Lucide Iconography: Clean 1.75px stroke SVG icons with unified 20x20 bounding boxes.

THE GOLDEN RULE OF VISUAL RESTRAINT

Never Let Effects Overshadow the Album Artwork

Album artwork is the cultural heart of PlayPix. All glass surfaces, borders, and glows are engineered to be quiet frames around the art-never competing with the musician's visual expression.

PHASE 3 &BULL; UI ARCHITECTURE

Home Dashboard & Floating Navigation Dock

The primary landing view showcasing personalized curation and the signature floating glass dock.

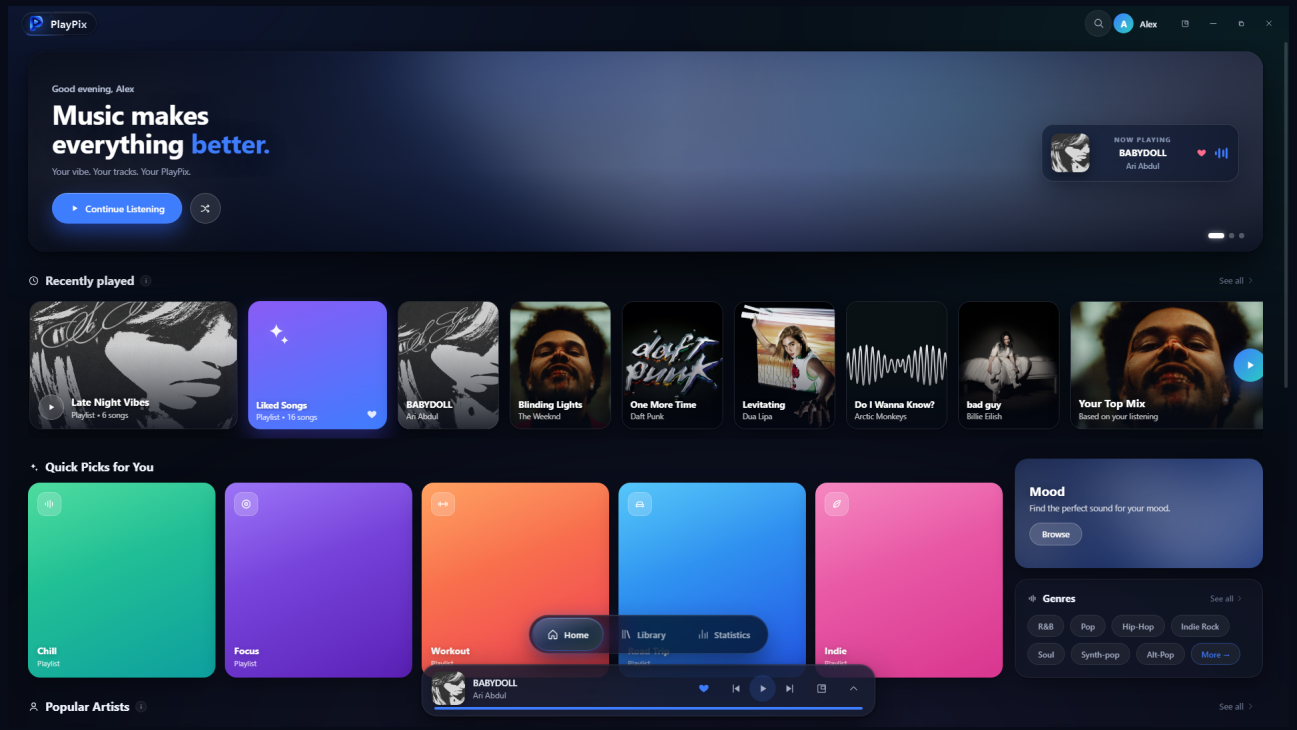

Figure 16.1: PlayPix Home Dashboard with Hero Carousel, Recently Played & Floating Glass Dock

Home Architecture Breakdown

• Hero Header Carousel: Features rotating banners with dynamic greetings ("Good evening, Alex"), quick play CTAs, and active now-playing badges.

• Recently Played Grid: Horizontal cards showcasing recently played albums with authentic artwork (*Fallen Angel*, *After Hours*, *AM*, *Discovery*).

• Floating Navigation Dock: Floating glass capsule positioned exactly above the music bar with Home, Library, and Statistics tabs.

• Bottom Music Bar: Unified transport controls, seekbar, volume, and mini-player launcher.

PHASE 3 &BULL; UI ARCHITECTURE

Music Library: Albums Grid & All Tracks View

High-density metadata presentation with instant sorting and visual record cards.

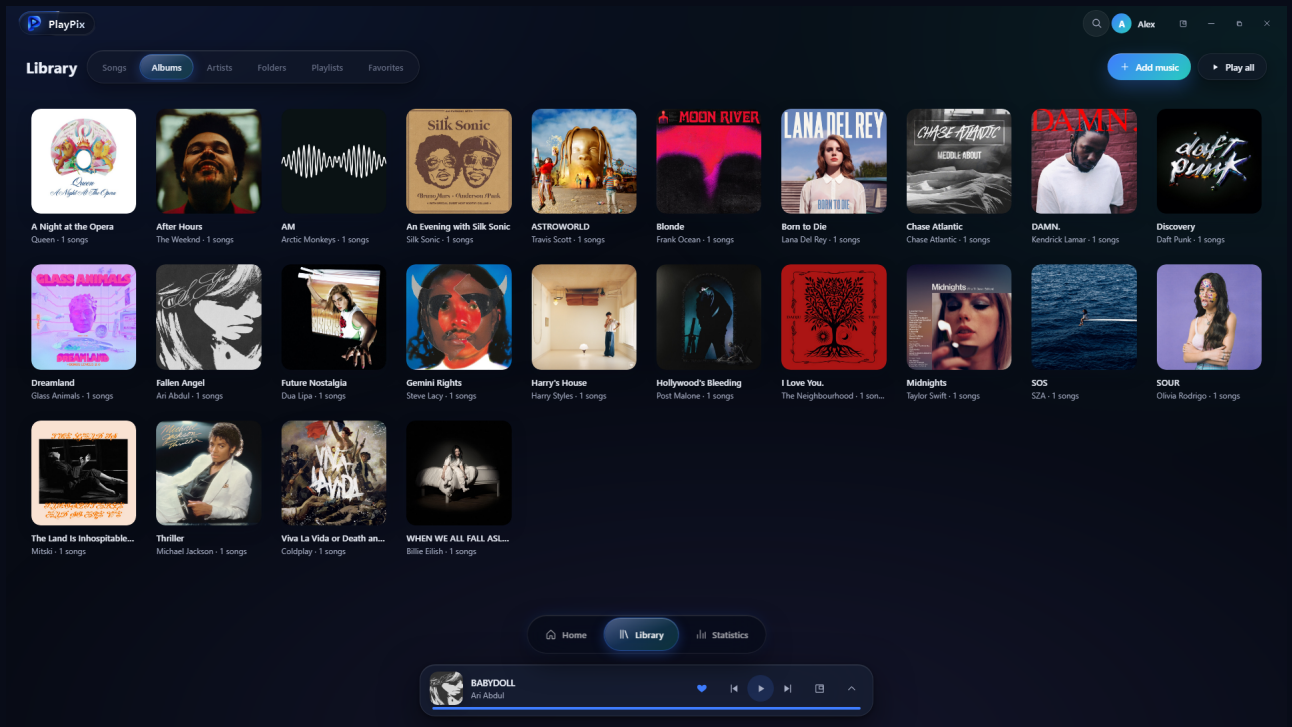

Figure 17.1: Music Library Albums View with Authentic High-Resolution Artwork Cards

Library Design System

• Albums Grid: High-density responsive card grid. Each card displays 1:1 artwork, album title, artist name, and track count with subtle hover zoom.

• Songs Tracklist: Linear track rows with leading artwork square, song title, artist, album, duration, and instantaneous heart favorite toggle.

• Virtual Scrolling: Instant 60 FPS scrolling capable of handling libraries exceeding 50,000 songs without DOM bloat.

PHASE 3 &BULL; UI ARCHITECTURE

Music Library: Artist Avatars & Genre Folders

Circular artist discography indexing and local filesystem hierarchy representation.

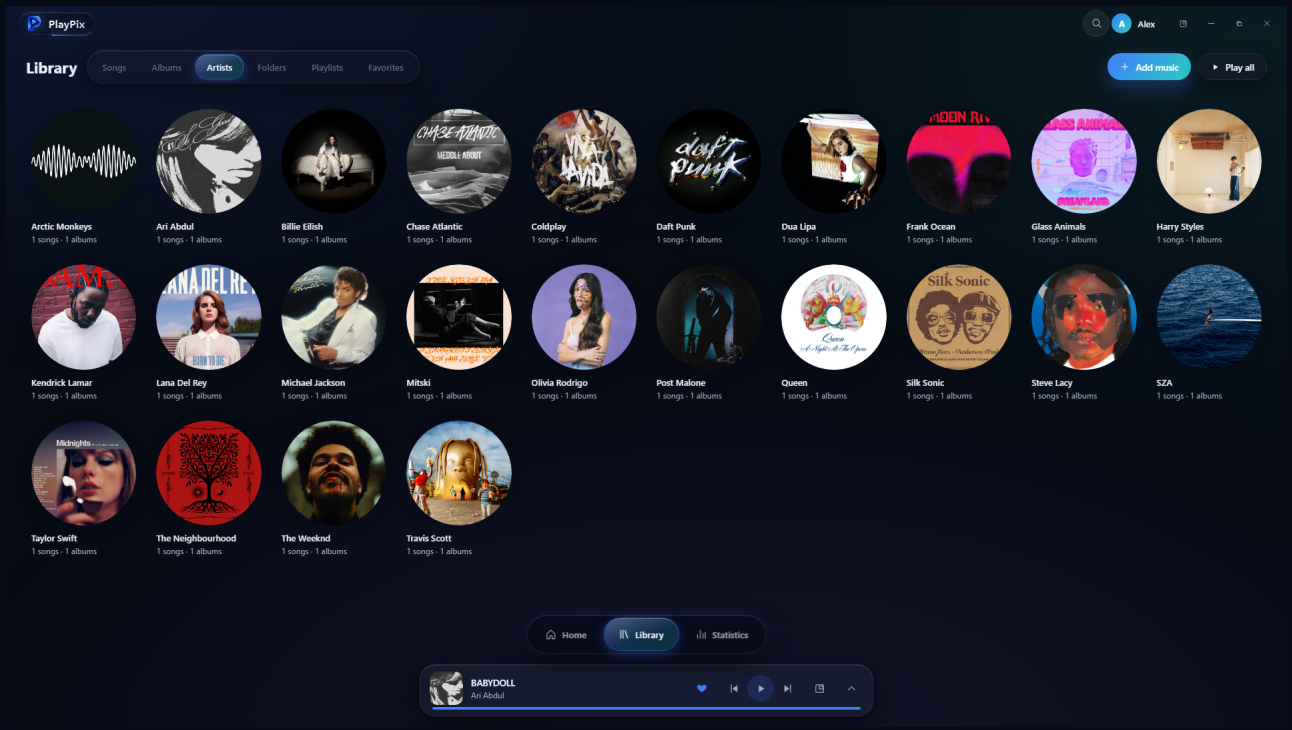

Figure 18.1: Artists View Featuring Circular Avatars & Discography Metrics

Artists & Folders Hierarchy

• Circular Artist Avatars: Automatically extracted artist portraits with circular masking and discography counts (songs & albums).

• Genre Folders View: Direct reflection of user's local disk hierarchy (e.g. Indie & Alternative, Electronic, Rock) for users who organize files manually.

• One-Click Play Context: Clicking any artist or folder instantly queues all contained tracks in album track order.

PHASE 3 &BULL; UI ARCHITECTURE

Immersive Now Playing & Circular Visualizer

The acoustic theater of PlayPix: centered circular artwork, radiant visualizer, and expanding tabs.

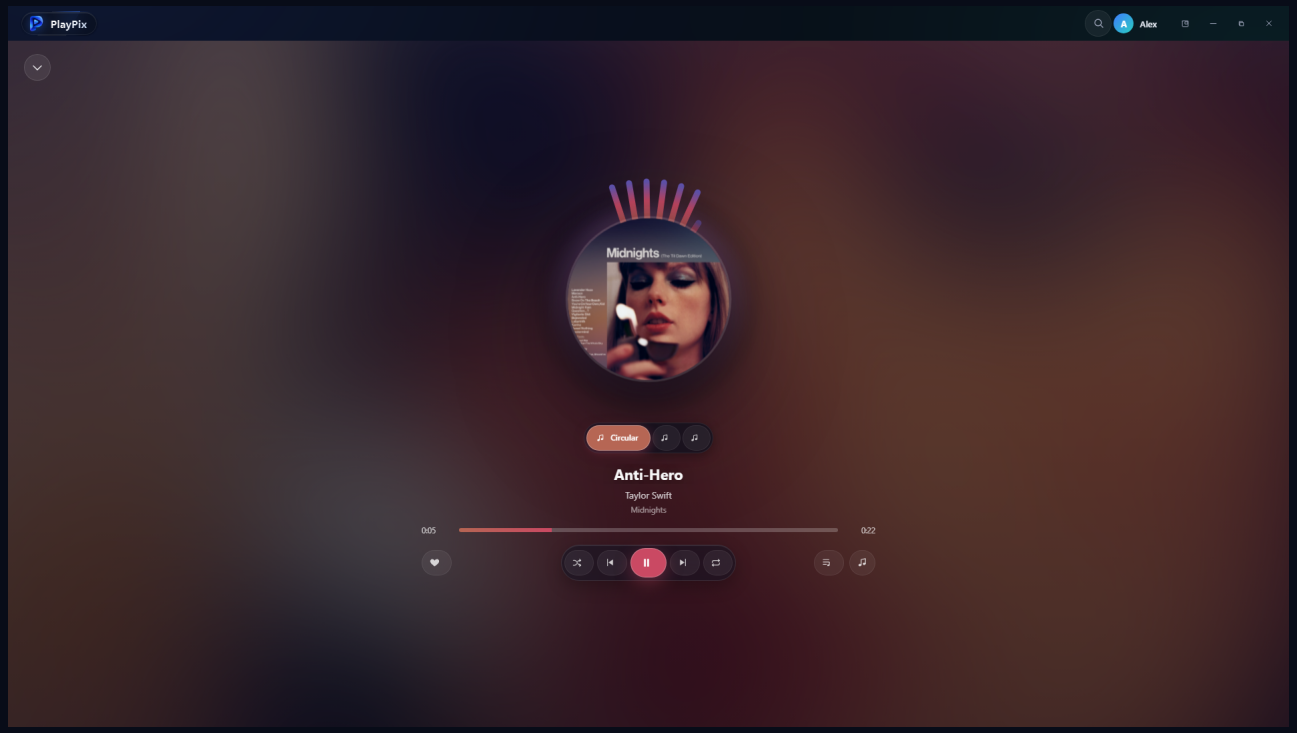

Figure 19.1: Full-Screen Now Playing Stage with Radiating Circular Visualizer & Expanding Pill Tabs

Now Playing Stage Elements

• Circular Artwork Stage: The album cover is cropped to a perfect circle at the center of the display with soft drop-shadow depth.

• Radiating Audio Visualizer: Real-time frequency bars radiating outward around the circle, synchronized to audio playback.

• Expanding Icon Tabs: Interactive mode pills below the cover expanding smoothly on hover (Circular, Spectrum, Particles).

• Ambient Backdrop Glow: Large blurred cover art backdrop creating cinematic atmospheric immersion.

PHASE 3 &BULL; UI ARCHITECTURE

Compact Windows Mini Player Card

Unobtrusive floating desktop audio control with rounded corners and always-on-top pinning.

Figure 20.1: Native Windows Mini Player Floating Card (270x270 Frameless Glass Window)

Mini Player Architecture

• Window Dimensions: Fixed 270 x 270 px frameless window with native OS shadow.

• Always-On-Top Pin: Dedicated pin button locks the mini player above video editors, IDEs, and browsers.

• Rounded Glass Geometry: 28px outer corner radius with frosted dark glass surface and top-lit reflection line.

• Full Transport Controls: Scrub bar, Play/Pause, Skip, Previous, and Favorite heart button all accessible without opening the main window.

PHASE 3 &BULL; UI ARCHITECTURE

Curated Playlists & On-Device Listening Statistics

Multi-cover mosaic playlists and private listening habit analytics.

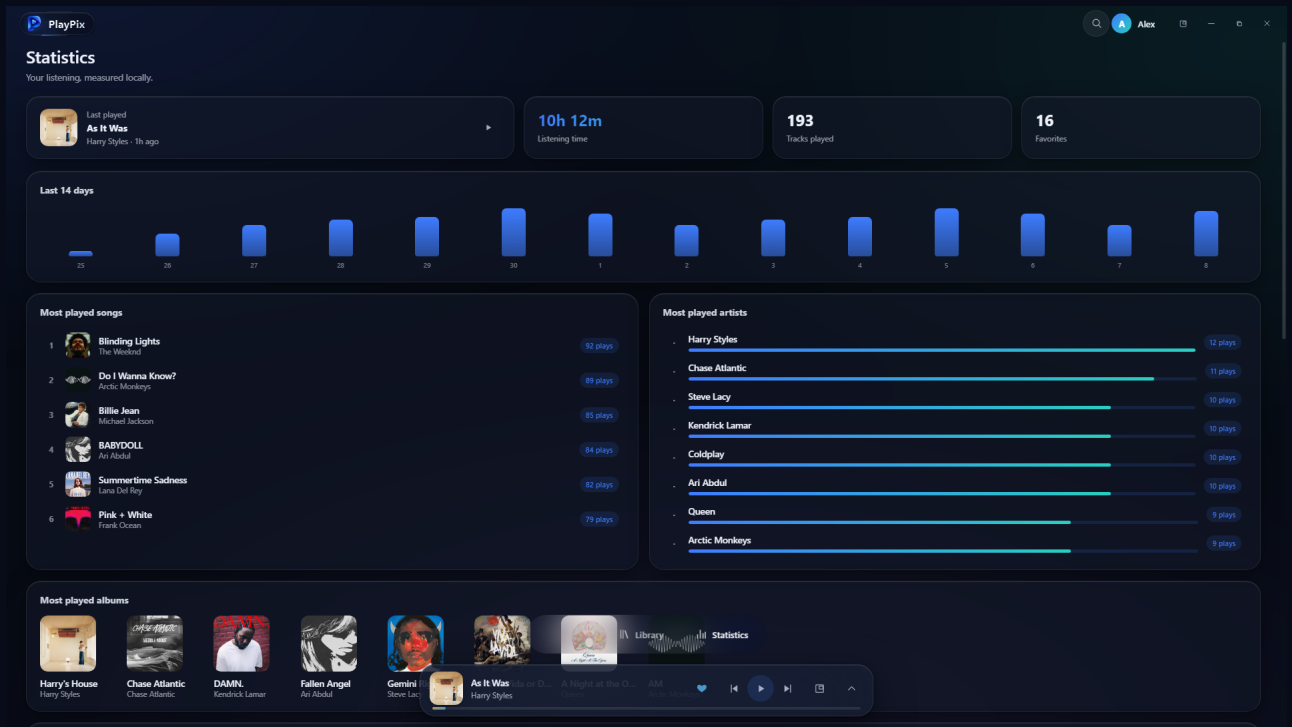

Figure 21.1: Listening Statistics Dashboard with 14-Day Activity Chart & Top Artist Progress Bars

Playlists & Statistics Features

• 4-Cover Mosaic Collages: Playlists automatically assemble an artistic 2x2 cover mosaic from their four most prominent tracks.

• 14-Day Activity Chart: Visualizes daily listening volume (hours and tracks played) using cobalt bar graphs.

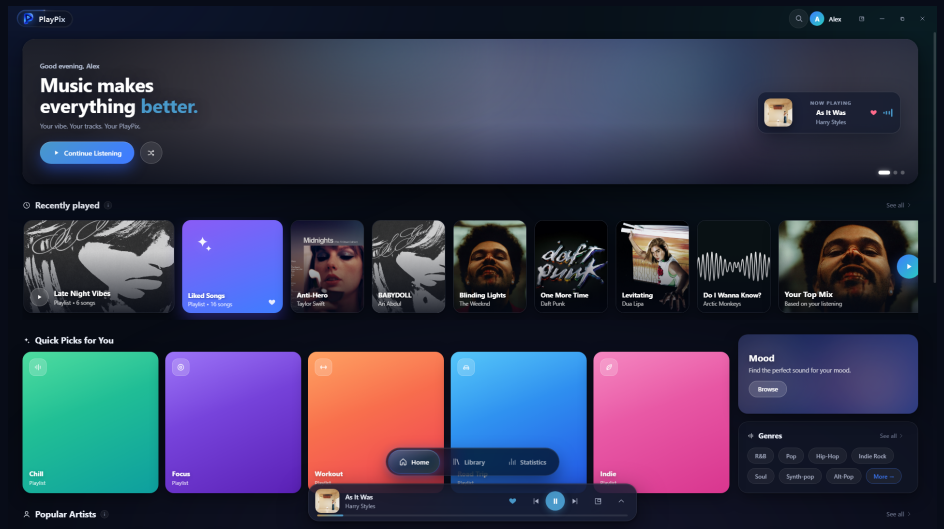

• Top Artists & Songs: Ranks most played artists and songs with progress bars and exact play counts.

• Zero-Telemetry Privacy: All listening metrics are calculated directly via local SQLite database queries-never transmitted to any remote server.

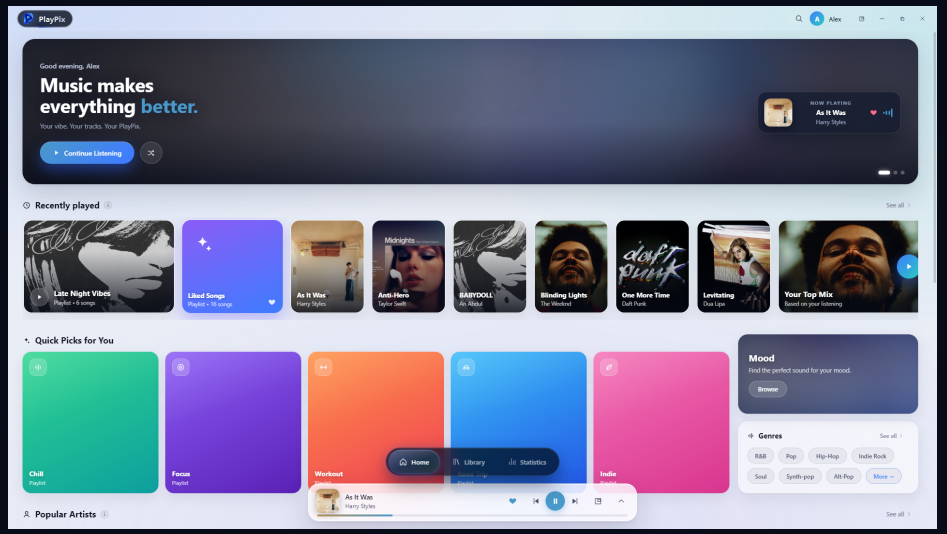

PHASE 3 &BULL; UI ARCHITECTURE

Dark Mode vs. Light Mode Comparison

Dual-theme parity ensuring flawless contrast and aesthetic elegance across light environments.

Dark Mode: Signature Obsidian & Cobalt Glass

Light Mode: Frosted Pearl Glass with High Contrast

THEME ARCHITECTURE & TRANSITIONS

Zero-Flicker 350ms Theme Crossfade

Switching between Dark and Light mode applies a temporary theme-anim transition class, smoothly interpolating background fills, borders, and typography over 350ms without audio interruption.

PHASE 4 &BULL; MOTION GUIDELINES

Motion Personality, Physics & Easing Curves

Principles governing all video transitions, UI micro-interactions, and promotional animations.

Motion Personality & Values

• Fluid & Rhythmic: Animations connect directly to musical tempo and acoustic weight.
• Restrained & Tactile: No chaotic bouncing or exaggerated zooms. Camera moves are smooth and intentional.
• Sub-Pixel Precision: Smooth interpolation curves preventing raster jitter on high-DPI screens.

Approved Easing Curves & Timings

• ease_out_cubic (0.215, 0.61, 0.355, 1.0): UI entrances and modal reveals.
• ease_in_out_cubic (0.645, 0.045, 0.355, 1.0): Camera panning and scene transitions.
• ease_out_back: Subtle logo reveal spring (s=1.70158).
• UI Micro-Transitions: 180 ms - 260 ms.
• Scene Crossfades: 400 ms - 650 ms.

MOTION BLUR POLICY

Subtle Directional Motion Blur Only

Motion blur should only be used during high-velocity camera transitions (exceeding 800 px/sec) and should never exceed a 45-degree shutter angle. Static UI text must always remain razor-sharp.

PHASE 4 &BULL; LOGO REVEAL

Logo Animation & Brand Reveal Storyboard

A frame-accurate 5-second motion sequence for video openers and splash screens.

TIMECODE	VISUAL COMPOSITION	CHOREOGRAPHY & MOTION	AUDIO / SFX
00:00.0 - 00:01.0	Deep Obsidian Space	Subtle cobalt radial light expands from screen center (r: 100px -> 450px).	50Hz deep sub-bass swell
00:01.0 - 00:02.2	Emblem Reveal	PlayPix logo scales from 0.75 -> 1.00 with ease-out-back spring. Circular glass pulse ring radiates out.	Harmonic glass chime (440Hz -> 880Hz)
00:02.2 - 00:03.4	Wordmark Tracking	Typography "PlayPix" tracks inward from +30px spacing to normal tracking. Subtitle reveals.	Soft acoustic micro-click
00:03.4 - 00:04.4	Ambient Shimmer	Subtle horizontal light sheen sweeps across the logo ribbon at 45 degrees.	Sustained harmonic pad
00:04.4 - 00:05.0	Transition	Camera pushes in slightly as logo dissolves into the Home Dashboard interface.	Air whoosh into music beat drop

PHASE 4 &BULL; PRODUCT FILM

52-Second Product Video Architecture & Delivery

Technical structure of the official introduction video and multi-format export standards.

Official 52-Second Product Film Structure

• Scene 1 (0-5s): Opening Brand Reveal with glowing emblem and pulse ring.
• Scene 2 (5-12s): Home Dashboard with Ken Burns zoom, card highlights, and dock reveal.
• Scene 3 (12-20s): Music Library multi-view (Albums grid, Songs tracklist, Artists, Folders).
• Scene 4 (20-29s): Immersive Now Playing with circular visualizer & expanding pill tabs.
• Scene 5 (29-38s): Mini Player card reveal, Light Theme cross-dissolve, Dynamic Album Art.
• Scene 6 (38-46s): Smart Playlists with 4-cover collages & on-device Listening Statistics.
• Scene 7 (46-52s): Final Brand End Card with tagline: "Music makes everything better."

Multi-Platform Format Specifications

• Master Widescreen (16:9): 1920 x 1080 (1080p) and 2560 x 1440 (1440p QHD) @ 30 FPS. H.264 High Profile, CRF 17, 320 kbps AAC.

• Vertical Mobile (9:16): 1080 x 1920 for Instagram Reels, YouTube Shorts, and TikTok. Center-crop UI with elevated floating HUD pills.

• Social Square (1:1): 1080 x 1080 for Twitter/X and LinkedIn product announcements.

VERIFIED DELIVERABLE PATH

Production Master Exports in Project Repository

Master video exports are rendered directly to: D:\anti\source\PlayPix-Product-Video\PlayPix-Introduction.mp4 and PlayPix-Introduction-1440p.mp4.

PHASE 5 &BULL; WEBSITE DIRECTION

Official Website & Landing Page Blueprint

Information architecture, visual hierarchy, and narrative pacing for the official PlayPix web presence.

Landing Page Section-by-Section Narrative

1. Hero Section: Large bold headline "Desktop Audio, Elevated." Floating 3D-angled glass mockup of PlayPix Home Dashboard with interactive live audio player demo.

2. The Local Sanctuary: Highlighting the joy of owning your music. "Zero subscriptions. Zero telemetry. 100% offline."

3. Visualizer & Themes: Interactive slider demonstrating Now Playing circular visualizer and Dynamic Album Art theme shifting between records.

4. Windows Native Integration: Pinned Mini Player showcase, keyboard media keys, and system tray integration.

5. Download CTA & Requirements: Direct Windows 10/11 standalone installer (.exe) & portable zip. Zero bundled bloatware.

Website Design Standards

- Background: Deep obsidian (#080c18) with subtle radial cobalt glow (#1e3a8a).
- Navbar: Floating glass capsule adhering to the in-app dock design.
- Typography: Inter or Segoe UI with crisp negative tracking on headlines.
- Primary CTA: Radiant cobalt button (#2563eb) with download icon and Windows logo.
- Performance: 100% static HTML/CSS/Next.js with WebP screenshot assets.

PHASE 5 &BULL; MARKETING VISUALS

Promotional Mockups, Social Media & Advertising

Guidelines for rendering high-impact marketing imagery without relying on generic stock photography.

Device Mockup Standards

• Minimalist Bezels: Show PlayPix running on sleek, borderless Windows laptop or ultra-wide desktop monitors.
• Angle & Perspective: Use clean 15-degree isometric or frontal orthographic angles.
• Atmospheric Backdrop: Set devices in clean, dark architectural studios with subtle cobalt rim lighting.
• Authentic Artwork: Always populate mockups with authentic, high-res famous records (*AM*, *Discovery*, *Midnights*).

Social & Campaign Guidelines

• Feature Spotlights: Dedicate carousel posts to single features (e.g. "The Anatomy of the Mini Player").
• Short-Form Video Teasers: 6-second clips highlighting the circular visualizer responding to a bass drop.
• Release Announcements: High-contrast typographic hero tiles with version numbers (e.g. "PlayPix 1.2 is Here").
• Strict Rule: Never use generic smiling stock people holding laptops.

PHASE 6 &BULL; DESIGN TOKENS

Complete Design Tokens Reference Table

CSS custom properties and design variables for seamless handoff to engineering.

TOKEN NAME	VALUE	CSS CUSTOM PROPERTY	USAGE SCOPE
Color Base Background	#080c18	--color-bg-base	Main application and web canvas background
Color Surface Card	#0f172a	--color-surface-card	Card containers, modals, and sidebar backgrounds
Color Primary Cobalt	#2563eb	--color-primary-cobalt	Primary action buttons, active indicator pills
Color Accent Cyan	#60a5fa	--color-accent-cyan	Highlight text, badge dots, and secondary glow
Glass Surface Fill	rgba(8, 12, 24, 0.72)	--glass-surface-fill	Floating navigation dock and mini player background
Glass Border Stroke	rgba(255, 255, 255, 0.10)	--glass-border-stroke	1px hairline border on floating glass capsules
Radius Capsule / Pill	9999px	--radius-pill	Dock outer container, button pills, tags
Radius Standard Card	12px	--radius-card	Album cards, playlist mosaics, stats charts
Motion Ease Out Cubic	cubic-bezier(0.215, 0.61, 0.355, 1)	--ease-out-cubic	UI entrances, hover expands, and modal reveals

PHASE 6 &BULL; CHECKLISTS

Creative Production & Quality Assurance Checklists

Step-by-step audit checklists for creative teams prior to public release.

Landing Page & Web Launch Checklist

- [ ] Does the page use the official deep obsidian (#080c18) foundation?
- [ ] Are screenshots unscaled and pixel-perfect at 1080p equivalent?
- [ ] Is the floating dock positioned above the music bar with equal padding?
- [ ] Is the product accurately described as a 100% offline desktop player?
- [ ] Does typography adhere to Segoe UI with correct weight hierarchy?

Video & Motion Graphics Checklist

- [ ] Are all animations tuned to smooth cubic-bezier or back easings?
- [ ] Does the logo animation follow the official 5-second reveal sequence?
- [ ] Are HUD pills positioned at top center without obscuring in-app text?
- [ ] Is the soundtrack energetic yet sophisticated with subtle UI micro-clicks?
- [ ] Are both 1080p and 1440p master renders exported with 320 kbps AAC audio?

BRAND CONSISTENCY QUALITY GATE

Zero Tolerance for Generic Marketing Clichés

Every marketing graphic, video cut, or web section must pass this test: Does it look like an authentic instrument for music lovers? If an element feels like a generic corporate SaaS advertisement, discard it.

PHASE 6 &BULL; AI MASTER PROMPT

Reusable AI Creative Direction Master Prompt

A comprehensive prompt to feed into future AI models to ensure 100% brand fidelity.

The PlayPix AI Brand Master Prompt

[COPY & PASTE INTO FUTURE AI SESSIONS]

ROLE & TASK: You are the Lead Brand Designer and Art Director for PlayPix, a modern desktop music player for Windows 10 & 11.

BRAND IDENTITY RULES:
1. Visual Theme: Deep Obsidian (#080c18) foundation, Surface Slate (#0f172a), with Electric Cobalt (#2563eb, #3b82f6) and Sky Cyan (#60a5fa) glowing accents.
2. Materials: Frosted glassmorphism (rgba(8,12,24,0.72) with 20px blur and 1px white border rgba(255,255,255,0.10)). Never use muddy, opaque, or overly neon surfaces.
3. Core UI Features: Floating capsule navigation dock positioned cleanly above the bottom music bar; centered circular album art stage in Now Playing with radiating circular audio visualizer; compact 270x270 floating Windows Mini Player card; dynamic album-art color extraction.
4. Product Truth: PlayPix is a high-performance local offline desktop music player. NEVER describe or depict it as a cloud subscription, web stream, or social network.
5. Typography: Clean, modern Segoe UI / Inter with bold uppercase badges and generous tracking.
6. Tone of Voice: Architectural, refined, confident, and deeply respectful of music ownership.
7. Music Curation: When displaying music, always use authentic, high-res international albums (e.g. Daft Punk, The Weeknd, Arctic Monkeys, Queen) with correct metadata.
